

DIRECT INSTALL
LIGHTING AND HVAC
REBATES UP
TO 70% OF
RETROFIT COSTS*.

The new utility-managed Direct Install program — brought to you by The SAVEGREEN Project® from New Jersey Natural Gas (NJNG) — is designed to help offset the upfront costs of comprehensive energy efficiency projects. **NJNG's generous rebates combined with a five-year 0%* APR On-Bill Repayment Program (OBRP) help make upgrading to high-efficiency equipment a budget-friendly pathway to saving energy, money and the environment.**

The program is structured in two categories to accommodate small- and medium-size facilities with an average annual electricity demand under 200 kilowatt (kW).

CUSTOMER ELIGIBILITY

After rebates, NJNG customers may be eligible to finance the balance at 0%* APR for five years with no fees, points or closing costs. Customers must have a good payment history with NJNG and no bankruptcies in the past seven years.

*Rebates up to 80% for tier-one customers or up to 70% for tier-two customers of retrofit costs. Terms and conditions apply. Incentive levels are based on equipment selection and the level of comprehensiveness of a project.

Tier One (Business) <100 kW

For small businesses with under 100 kW average annual electricity demand.

Tier One (Special) <200 kW

For municipalities, public K-12 schools and businesses in Urban Enterprise Zones (UEZ) with under 200 kW average annual electricity demand.

Tier Two 101 kW – 200 kW

For medium-sized businesses with an average annual electricity demand of 101 – 200 kW.
